Dr. S.S.C. Chakr Rao

Chairman, Indian Resuscitation Council Federation

Sub : AAPI USA endorses INDIAN resuscitation council Federation application to ILCOR.
(AAPI As Indian Nonresidential Indian Professional Organization)

The American Association of Physicians of Indian Origin Founded in 1982 represents the values and interests of more than 80,000 practicing physicians in the United States more than 40,000 medical students, residents, and fellows of Indian origin in this country. 1 in 7 people in the USA, at some point in their health care, are touched by a physician of Indian origin and we are truly honored for this privilege and responsibility.

AAPI working with Indian resuscitation council federation and its member organizations. AAPI helped to initiate IRCF. AAPI sponsored IRCF members to attend ILCOR annual scientific meeting at Cape Town in 2019. AAPI and alumni of many medical schools helped resuscitation courses in India. AAPI endorses IRCF application for ILCOR. AAPI will continuously encourage all its members and alumni associations to support IRCF resuscitation courses in India and support making every citizen a life saver.

AAPI supported nurses' education in Basic life support. We found significant gaps in in training nursing student for CPR certified courses except in few institutions.

We are trying to improve quality of training for Emergency medical technicians with high quality, courses from 1 to 2 years to 4 years course across India. EMT is like soldier in EMS. AAPI with advocacy brought mandatory Emergency medicine department in all 612 medical colleges across India. This will bring many postgraduates in emergency medicine for physicians, Emergency medicine postgraduate is like captain for Emergency medicine services. AAPI Global Medical education recognized and like to bring solutions for these gaps in nursing and EMT and health care providers with help of IRCF to bring high quality resuscitation courses.

Sincerely,

Ravi Koli, MD

President, AAPI
